

The  
**Spread Spectrum Radio (SSR)**

Provides the  
**Ultimate**  
In  
**Wireless Data  
Connectivity**  
All in a  
**Compact Package**

### Features

- Multi-Port Interface
- Spread Spectrum Technology
- Frequency Hopping
- 7 diagnostic LEDs
- Compact Package
- 1200-57600 bps throughput
- 0.3 to 20 Mile Range
- Transparent Operation
- Peer to Peer
- Point to Point
- Point to Multi-point
- Low Power
- Hermetically Sealed
- 7-Year Transferable Warranty
- 24/7 Factory Support

### Applications

- Oil & Gas Exploration
- Mandated Reporting
- Environmental Impact Studies
- Building Automation
- Site Remediation Survey
- Home Land Security
- Water/Wastewater Management
- Power Sub-Station Control
- Manufacturing Process Evaluation
- Asset Monitoring and Control

### Benefits

- Lower Installation Costs
- Simplified Communications
- Built-in Diagnostics
- Secure Data Acquisition
- No Licensing Required

12/26 VDC Power

RS232/RS485  
Selectable

7-year Transferable  
Warranty

3" X 1.25"

DIN and Bulk Head  
Mounting

### Overview

The simple, easy to install, AGM Series 2000 Spread Spectrum Radio (SSR) provides the cost effective alternative to bulky wiring for routing, interconnecting and accessing all of your field sensors and controllers.

Frequency hopping, Spread Spectrum technology insures data integrity and minimal interference when used in electrically noisy environments.
